LEED AP Exam Study Groups

The following outline has been developed to help you succeed in passing the LEED AP Exam. It requires a commitment to work outside of meeting times on study aids, memorization and review. In return, it promises a systematic approach to make your study time efficient, productive and geared directly toward passing the exam using the resources of those who have already completed it successfully. This group in no way takes the place of a USGBC educational course.

- Session 1** Introductions, overview of the course and setting up the flashcards for each credit
11.4.2008
HW: Complete all credits and intents on flashcards and memorize
- Session 2** Review of credits with intents and an overview of all credits to complete flashcards
11.11.2008
HW: Complete and begin to memorize all credit requirements, strategies/submittals, standards, exemplary performance; Have an understanding of all applicable calculations, resources and considerations Use credit review activities at will
- Session 3** Review of credits, cover additional exam content: LEED coordination, implementation and technical analysis, and review test format/credit worksheets
12.2.2008
HW: Complete memorization of ALL credits and requirements.
Spend time on the USGBC website, identifying forms, fees, process, CIRs and other resources
Complete credit worksheets and activities
- Session 4** Review of credit worksheets, introduction to common questions, “tricky” formats, and general test strategies and final overview of all credits and additional exam content
12.9.2008
HW: Review of credits and requirements and Complete additional practice test resources
