

MARYLAND

BREAKFAST ROUNDTABLE

Materials & Resources

Join us for our fourth Breakfast Roundtable as we examine the Materials & Resources (MR) credits. Networking over light breakfast is followed by a general overview of the MR credits with a panel discussion to explore more detailed credit applications across the LEED rating systems (NC, CI, CS, EBOM.)

Neal Fiorelli, LEED AP of Lorax Partnerships will lead the overview of the MR credits and detail the process and paperwork required to achieve the credits. Tom Liebel, AIA, LEED AP of Marks Thomas will speak to the specification and selection of renewable and regionally sourced materials; and Marc Shaener, LEED AP of EnviroSolutions will outline the requirements for keeping waste out of a landfill, and into a recycling facility. Question and answer session to follow. Please join us to understand the process to meet LEED requirements for the materials going into and out of your next construction project.

Location Marks Thomas Architects

1414 Key Highway, 2nd Floor, Baltimore, MD 21230

Date October 2, 2009

Time 8:00 am - 10:00 am

Register www.usgbcbaltimore.eventbrite.com

Tickets for the event are \$15 for members, \$25 for non-members and \$35 for all at the door (cash or check only), so register early to get the discount! Light breakfast, coffee and juice will be served. Registration begins at 8 am, and the program will start promptly at 8:30 am.

Speaker Bios:

Neal Fiorelli is a founder and principal with Lorax Partnerships, and a founding executive board member of USGBC MD and is currently serving as the LEED Training program director for the Chapter. Since forming Lorax it has been his mission to help clients justify, develop and certify LEED buildings.

Tom Liebel, AIA, LEED AP is an Associate Principal with Marks, Thomas Architects, a Baltimore-based multi-disciplinary design firm. One of the first 25 LEED APs in the country, Tom has been integrating sustainable design principles into a variety of adaptive use and historic preservation projects over the past fifteen years. These Projects have received multiple local, state and national awards for design, smart growth, sustainable design and historic preservation. Author, critic and mentor, Tom has consulted on green projects nationally and internationally and has recently authored a chapter on sustainable design for the National Trust for Historic Preservation's Main Street Program publication, *Revitalizing Main Street: A Practitioner's Guide to Comprehensive Commercial District Revitalization*.

Marc Shaener, LEED AP is a USGBC MD Board Member, with over 20 years experience in the recycling industry. Marc developed a comprehensive LEED compliant construction waste management program for EnviroSolutions, Inc., a regional solid waste management company. This program has transformed the way construction waste is managed throughout the Mid-Atlantic.
