Hot, Flat and Crowded: Why We Need a Green Revolution – and How It Can Renew America

by Thomas L. Friedman

Friedman explains how global warming, rapidly growing populations, and the astonishing expansion of the world's middle class through globalization have produced a planet that is "hot, flat and crowded." Already the earth is being affected in ways that threaten to make it dangerously unstable. In just a few years, it will be too late to fix things – unless the United States steps up now and takes the lead in a worldwide effort to replace our wasteful, inefficient energy practices with a strategy for clean energy, energy efficiency, and conservation that Friedman calls Code Green.
