

USGBC Charlotte Region Chapter

Emerging Green Builders

Feature Firm

Are you interested in learning more about what firms are contributing to our Sustainable Future?

If so, join other emerging professionals for an evening networking and learning more about EGB's September Feature Firm:

EGB's 'Feature Firm' Optima Engineering, will discuss with us how they are contributing to our sustainable future by sharing the process of completing a sustainable or green project. This discussion will explore what it takes to spearhead a sustainable project, what sustainable ideas guide a project, tips and shortcuts that helped make the project a success, lessons learned, contacts, and resources to additional information, and the legal issues or risks involved with a sustainable project.
