ENERGY STAR Training**

Presented by Justin Wilson, Building Performance Solutions

Monday October 6, 2008

9:00 a.m. - 4:30 p.m. (Registration begins at 8:30)

**Stapleton Master Community Association Community Room
2823 Roslyn Street Denver, CO 80238**

Part 1 - Classroom Session

Learn to Understand the technical requirements of the ENERGY STAR program including:

- *Insulation types, systems and inspection requirements*
- *Compliance with the ENERGY STAR Thermal By-pass checklist*
- *Mechanical systems and load calculations requirements*
- *Lighting and appliance recommendations and requirements*
- *Ventilation system recommendations*

Part 2 - Field Session: Inspection and Diagnostic Demonstration

- *Multipoint, diagnostic blower door and duct leakage tests*
- *Mechanical, insulation and thermal by-pass inspection*
- *Rating documentation*

Who should attend:

This class is designed specifically for developers, building contractors, building inspectors, HVAC professionals and architects. Funders of affordable housing are also welcome. Space is limited. Priority will be given to individuals & organizations involved in developing affordable housing in the City and County of Denver.

Training Fee:

\$40/person for-profit; \$30/person non-profit and government agencies
Continental Breakfast and Lunch are provided
