

Energy Modeling for LEED for New Construction Projects

Are you ready to enter the rapidly growing green building market?

Attend the Energy Modeling for LEED® for New Construction (LEED-NC) Projects Module presented by the U.S. Green Building Council. This training session will teach you to manage energy modeling during design and successfully leverage this powerful decision-making tool.

WHY LEARN ABOUT LEED?

Ask any of the 5000 building owners seeking LEED certification right now. Owners and developers are demanding green facilities that save money while protecting the environment, improving health and performance of students, and creating a better learning environment. USGBC's LEED-NC Green Building Rating System™ is the nationally recognized standard for green buildings. LEED is already being used by green building projects in all 50 states and the market continues to grow.

WHO SHOULD ATTEND?

Industry professionals seeking to increase their understanding of the LEED-NC Rating System and green building strategies, benefits and resources:

- Architects
- Engineers
- Owners
- Manufacturers
- Developers
- Designers
- Consultants
- Contractors
- Government Officials

WHAT'S COVERED

- Energy modeling protocols of ASHRAE Standard 90.1 for LEED-NC Energy and Atmosphere credit compliance
- Information on common pitfalls, misunderstandings, documentation
- LEED Project case studies and a sample exercise
- Available tools and resources
