

## USGBC – St. Louis Regional Chapter

*In partnership with BOMA and IFMA*

### An Overview of LEED for Existing Buildings (LEED-EB)

By Michael Arny, President of Leonardo Academy and  
Chair of LEED-EB Development Process

*A Leonardo Academy AcceleratingGreen Presentation*

Founder and President of Leonardo Academy, Michael Arny leads this nonprofit's work of applying an interdisciplinary approach to putting the competitive market to work improving the environment and helping organizations increase their sustainability. A registered professional engineer in the State of Wisconsin and a LEED accredited professional, Arny has worked on energy and environmental issues his entire career. He was Chair of the USGBC LEED-EB Committee from 2001 through 2005, leading the committee's work on developing, pilot testing, and approval of the LEED-EB Rating System.

His presentation will provide a fast-paced overview of how LEED-EB is an important tool that helps architects, facility managers, and building owners succeed at overcoming the challenges and capturing the opportunities of implementing LEED-EB in buildings and across organizations. It alerts them to the issues that will change their professional lives as LEED-EB is integrated into the procurement of design and construction of new buildings.

#### **When**

Thursday, September 14, 2006

5:30 – 6:15 pm Networking

6:15 – 7:30 pm Program

#### **Where**

Missouri Botanical Garden's Monsanto Center  
4500 Shaw Boulevard (63110)

*\*at Shaw and Vandeventer, one block west of the Missouri Botanical Garden - overflow parking is available across Shaw from the building\**
