

# LEED for New Construction and Major Renovations Technical Review

Presented by the U.S. Green Building Council

The LEED® for New Construction Rating System is designed to guide and distinguish high-performance commercial and institutional projects, including office buildings, high-rise residential buildings, government buildings, recreational facilities, manufacturing plants and laboratories.

This workshop goes beyond the basics of the LEED® for New Construction v2.2 Rating System, using case studies and exercises to provide an overview of the building certification process, as well as a brief exam review.

## LEARNING OBJECTIVES

After completing this course, you will be able to:

- Identify the technical requirements of LEED for New Construction & Major Renovations
- Develop an understanding of how LEED is being used nationally to define various levels of green project design
- Use the tools, information, and lessons learned from case studies to incorporate green building practices into a project
- Prepare for the Accreditation Exam using sample questions and answers. *\*This course does not guarantee a passing score on the LEED AP Exam*

## WHO SHOULD ATTEND?

Building industry professionals seeking to increase their understanding of the LEED® for New Construction Rating System and green building strategies, benefits and resources.

- Architects
- Designers
- Consultants
- Owners
- Engineers
- Developers
- Contractors
- Manufacturers

## LEARNING LEVEL

This is a 300-level course. Consider our *Green Building Basics and LEED* course as preparation.
