

Using LEED for New Construction on Healthcare Projects

Are you ready to enter the rapidly growing green building market?

Attend the Using LEED® for New Construction (LEED-NC) on Healthcare Projects Module presented by the U.S. Green Building Council. Professionals who own, design, build, operate and maintain healthcare facilities will gain insight on leveraging LEED concepts into health care projects.

WHY LEARN ABOUT LEED?

Ask any of the 3000 building owners seeking LEED certification right now. Owners and developers are demanding green facilities that save money while protecting the environment, improving health and performance of students, and creating a better learning environment. USGBC's LEED-NC Green Building Rating System™ is the nationally recognized standard for green buildings. LEED is already being used by green building projects in all 50 states and the market continues to grow.

WHO SHOULD ATTEND?

Industry professionals seeking to increase their understanding of the LEED-NC Rating System and green building strategies, benefits and resources:

- Architects
- Engineers
- Owners
- Manufacturers
- Developers
- Designers
- Consultants
- Contractors
- Government Officials

WHAT'S COVERED

- Detailed information on the draft of the LEED-NC Application Guide for Healthcare
- Successful LEED case studies and lessons learned from healthcare projects implementing green strategies
- Tips for achieving LEED compliance
- Green building costs and benefits
- Available tools and resources
